

GDPR - National Screening Programmes

National screening programmes

- The NHS provides national screening programmes so that certain diseases can be detected at an early stage. These screening programmes include bowel cancer, breast cancer, cervical cancer, aortic aneurysms and a diabetic eye screening service.
- The law allows us to share your contact information with Public Health England so that you can be invited to the relevant screening programme.
- More information can be found at: <https://www.gov.uk/topic/population-screening-programmes> or speak to the practice.
